

EMBL Australia PhD Course

Applications open until 18 August 2024

25-29 November 2024

Monash University, Clayton Campus

The EMBL Australia PhD Course is a week-long course, jam-packed with workshops and lectures from Australia's best researchers to set you - the next generation of researchers - up for success. Modelled on the renowned EMBL training course, this program offers a unique opportunity to get a head start in your scientific career.

Course topics include:

- » Microscopy masterclass
- » Regenerative medicine in action: a tissue-engineering workshop
- » Microbiology: the invisible universe
- » Epigenetic landscapes in development and disease
- » Plus soft skills development, Three-Minute Thesis competition & poster session

Who should apply?

First and second-year PhD students from all research areas across the life sciences.

"It was a very unique, collaborative experience and opportunity to see other sides of science that we wouldn't normally be exposed to."

- Madeleine Walton-Smith, 2023 PhD Course attendee
